Introducing **SilotitePro1800 Sustane**.

Part of Berry's B Circular Range, a testament of Berry's customer promise and our ongoing commitment to delivering sustainable solutions supporting your goals.

SilotitePro1800 Sustane combines the benefits of our Pre-orientated Pro Technology with recycled content, resulting in less film usage and an improved environmental profile.

Delivering high levels of technical performance, **SilotitePro1800 Sustane's** longer length allows you to wrap more bales per reel, saving time and preserving silage quality.

Through lightweighting and the incorporation of recycled content, the environmental load of **SilotitePro1800 Sustane** 23 µm film (with 25% PCR) is ±24% less than our standard 25 µm film (with 0% PCR), supporting the circular economy and helping to divert waste from landfill.

SilotitePro1800 Sustane has been certified by RecyClass, offering users full traceability of recycled content in terms of chains of custody.

Conveniently packaged in a PE sleeve allowing balewrap and outer packaging to be recycled together, eliminating the need for separation.~

Sustainable Agricultural Solutions From Silotite

- **RecyClass certified PCR content** > improved environmental profile^
- **Time savings** > more bales wrapped/hour^
- **PE Sleeve packaging** > no bulky boxes
- **Recyclable**~ > recycle sleeve and film together
- **20% less reels needed**^ > less transportation and storage

Specifications – SilotitePro1800 Sustane

Width (mm)	Thickness (µm)	Length (m)	Packaging	Colours Available
750	23	1800	Sleeve	<input type="radio"/> Green <input type="radio"/> White

**Calculated using the equation in the Circular Stretch Film Project Life Cycle Analysis (LCA) from MPR&S published 26th February 2021.

^ Compared to Silotite Original 25µm, 1500m film.
