BALETITE[®]

A Product of Silotite

Baletite is a baler film that has been created for baling machines that can apply film instead of net. Baletite provides extra layers of protection and creates an air barrier, which reduces white mould growth and silage losses.

- High holding force > **better shaped bales**
- Recyclable* > **recycle with bale wrap**
- Consistent performance > **fewer silage losses**
- Smooth film surface > **easier feed out**

Technical Specifications - Baletite

| Application | Width (mm) | Thickness (µm) | Length (m) | Reels Per Pallet (#) | Pallet Dimensions (cm) | Pallet Height (m) |
|-------------|------------|----------------|------------|----------------------|------------------------|-------------------|
| Grass | 1280 | 16 | 2000 | 20 | 112 x 130 | + 1.10 |
| Grass | 1380 | 16 | 2000 | 20 | 112 x 147 | + 1.10 |

Baletite is manufactured in ISO 9001, ISO 14001, ISO 45001 and ISO 50001 accredited manufacturing facilities.

In the unlikely event of a problem each reel of Baletite is individually labelled to ensure 100% traceability.
